Providing Quality Metric Industrial Products & Exceptional Customer Service Since 1963

Fasteners ● Wrenches ● Cutting Tools ● Measuring Tools ● Tubing/Fittings ● Assortments

RoHS / REACH / SVHC / WEEE Compliance Statement

RoHS refers to Hazardous Material in electrical and electronic equipment.

WEEE is in reference to electrical waste and electronic equipment.

REACH / SVHC refers to registration, evaluation and authorization of chemicals

These directives established maximum wt. % limits in regards to potentially hazardous elements contained in an ever increasing list. All applicable products introduced into the EU market and other areas after July 2006 must pass these compliant directives.

Some common products affected by these directives for compliance include household appliances, e.g. Refrigerators, telecommunications, electronics, medical and other control instruments.

Within our fastener Industry most products are naturally compliant such as; stainless steel, un-plated carbon steel, trivalent (clear) zinc plated steel, nylon fasteners and their components, as well as non-ferrous metals.

MMCC is aware of the current RoHS / REACH / SVHC / WEEE directives and is conforming with legislative requirements and business continuity concerns related to them.

Metric & Multistandard Components Corp. is in compliance with these directives & fully supports restricting these various elements.

Regards,

Metric & Multistandard Components Corp.
